Relevant Projects

Sucrose Discord Bot

2020 - Present

<https://github.com/hi-im-andrew/Sucrose>

- Created a multi-purpose Discord bot that provides information about Genshin Impact and includes other various user-requested features
- Written in Python, using the Discord.py API
- Features: Genshin Impact game data from genshin.dev API, Danbooru image search
- Planned features: League of Legends player stats from Riot API, Genshin Impact gacha (gambling) simulator with inventory, stock market information lookup, Twitch.tv API integration, many more

Minecraft Server Hosting

2011 - Present

- Manually hosted countless 24/7 Minecraft servers (vanilla and modded) for friends on a server rack running Linux
- Uses SSH and FTP network protocols to access and transfer files between machines
- Wrote bash scripts using nano in order to ease the process of allocating a desired amount of RAM into servers

Experience & Extracurriculars

Nutripair

Nov 2021 - Present

Full Stack Developer

UC Irvine

- Frontend app development with React Native.
- Used Mapbox SDK and Mapbox GL to render custom maps on mobile.
- Placeholder for now :)

Alpha Phi Omega

Oct 2019 - Present

Pledge Interchapter Secretary (Oct-Dec 2019)

UC Irvine

- A national service fraternity aimed to develop leadership, promote friendship, and provide service to humanity
- 30+ hours of service contributed to community, campus, nation, fundraising, and fraternity
- Helped organize events with other schools' APO chapters as Interchapter Secretary for the Alpha Nu pledge class

Valley Transportation Authority

Jun 2018 - Jul 2018

Environmental Health and Safety Intern

San Jose, CA

- Filed thousands of bus and light rail occurrence reports in a professional setting
- Kept track of safety equipment rentals and organized shipments of safety vests to bus fields
- Organized hazardous and non-hazardous waste manifests in Excel spreadsheets

Accomplishments
